

**Procurement cost estimate for conducting a longitudinal (three waves) online survey in 11 countries, with a minimum of 550 respondents in each country participating in all measurements, as part of the Horizon Europe RIA project "Politics of Grievance and Democratic Governance", acronym PLEDGE.**

In order to determine market prices and estimate the value of the contract, the Faculty of Psychology at the University of Warsaw is requesting an estimate for the service.

**I. Ordering party**

University of Warsaw  
Krakowskie Przedmieście 26/28  
00-927 Warsaw, NIP: 525-001-12-66, REGON 24000001258.  
Faculty of Psychology  
Stawki 5/7  
00-183 Warsaw  
Contact person for the above mentioned case: Maciej Siemiątkowski  
(maciej.siemiątkowski@psych.uw.edu.pl)

**II. Subject of the estimation**

The subject matter of this order is the preparation and implementation of a three-wave longitudinal survey using the CAWI method on an online panel, with measurement carried out three times every six months on the same group of people, for which data would be collected on comparable survey platforms in 11 European countries: 1) Finland, 2) Sweden, 3) Germany, 4) Greece, 5) Poland, 6) Belgium, 7) Spain, 8) Turkey, 9) Hungary, 10) the United Kingdom, and 11) Ukraine. Importantly, in Belgium and Ukraine, the survey will be prepared in two language versions, from which each respondent will be offered a choice: Dutch and French in Belgium, Ukrainian and Russian in Ukraine.

In each country, the first wave sample should be a representative random quota sample (gender x age x size of place of residence) of adults living in the country and should consist of approximately 1,100 individuals. The final sample, i.e., individuals who participated in all three measurements, should be approximately 50-70% of the first wave sample. The final questionnaire will consist of about 150-200 items. The order would also include the preparation of a survey script based on templates provided in MS Word (.docx) format and the provision of a dataset in SPSS (.sav) format with variables labeled according to the content of the questionnaire.

Within the scope of the Order, the Contractor shall be obliged, in particular, to:

- recruit the participants of the study and provide them with remuneration
- prepare the survey script (adapted to the form of online study) on the basis of the provided questionnaire;
- provide the Ordering Party with links to test and verify the programmed online surveys.
- technical support of the survey;
- conduct the survey in three parts;
- prepare partial databases after the first and second part, and an overall database after the third part.

### **III. Lead time**

The survey should be completed within 15 months from the signing of the contract including:  
Stage I (first measurement) - within two months from the signing of the contract;  
Stage II (second measurement) - 6 months after Stage I;  
Stage III (third measurement) - 6 months after Stage II.

### **IV. Pricing of the service**

As part of the presented price calculation, we ask to provide both the **net** and **gross** price (**if applicable**) in **PLN** (it is permissible to specify the amount in Euro - in this case the exchange rate announced by the National Bank of Poland on the day of publishing the offer shall be used for conversion and comparison of offers) and the order specifications, including the compliance with the written requirements, by 05.07.2024 at 16:00 to the address

maciej.siemiatkowski@psych.uw.edu.pl

This request is intended to determine the estimated value and does not constitute an offer within the meaning of Article 66 of the Civil Code, nor is it an announcement within the meaning of the Public Procurement Law.
